Stop reviewing the value of the gamepass on individual game reviews. If you want to 1 star the gamepass then do it to Microsoft. This game is perfectly fine.

Heart felt, relaxing and wonderfully designed

I absolutely adore this title. You can feel the genuine care and dedication of this small team in creating this world. Visually the art design is clean and simple with excellent use of colour and lighting to elivate the aesthetic. It such a relaxing game, diving, sailing, exploring the islands. The music is also brilliant, perfectly setting the tone of the game. An open world that won't take ages to explore but will keep you hooked. My only gripe is the occasional audio glitches and horrific slowdown when fighting the cloth guards. Patch

Soul Fruit

I enjoyed this game. It reminded me of The Wind Waker as far as sailing goes. It has mini games, shooting gallery, racing, stunt diving. Be ready for several music sequences with guitar-hero style QTE.. But where this game really excels is with the 'Soul Jump' ability that lets you inhabit and control any animal or inanimate object, which leads to some fun and interesting results. Will definitely appeal to a younger audience, thouh dont be put off by that.

Fun gameplay

The game runs fine, controls well and has a nice amount of different mechanics. The downside of that being information overload and 3 seconds of learning gameplay between cutscenes early game.The biggest majority of start is just cutscenes with very minimal play between, can't see many gamepass kids getting past the first hour.To devs: Get off gamepass before your good game gets review bombed.

Audio broken

Seems like a nice chill exploration game with good insights into a rarely examined culture. Sadly for me the audio begins to start distorting and warbling after about 15 minutes, forcing me to reboot the game constantly, so i won't be playing any further.

Reviews based on framerate?

The framerate is nothing to do with gameplay stop whining sbout 30fps. I give the game 4 stars based on freedom of exploration in a nice world full of surprises. Navigation can be tricky as you can't always see yourself on the map and it's a huge world. I've never been a coconut before today.

Great fun

If you don,t like exploring and collectibles in a atmospheric world full of wildlife and hidden secrets with great music stay away. Otherwise have fun gamers(60 fps would be nice, but not necessary in a slow paced game)

Impressive

I never leave reviews, however, I felt it necessary here. This is by far one of the most impressive games I have had the pleasure to play. Character movement and manipulation should be implemented across all games. Mini games are unique and fun, the ukelele mechanics are amazing. Thank you for this gift.

Actually 4🌟🌟

Review bombed by racists and miserable wasters. The game is good. Controls well, looks nice with bright cartoonish style, sound design solid. If you can play subtitled games it is fine, but there's no English language audio. Feels heartfelt though certain areas feel a touch half baked. Lots of accessibility options. LGBT inclusive. Explore at your own pace, the story conveys urgency but I don't think any of it is actually time sensitive.Largely it's a game made beautifully with love for what it tries to portray.
